To whom it might concern

Premium Pellet Ltd has been using City Reporter for about 5 months now for our dust inspections. It is well received by our staff and is working well for us. We feel that this system allows good tracking of inspections and follow-ups to assure all levels of management that our plant is kept clean at all times.

With the photo options, there is no question of itemization for cleanup staff. We also see potential for using this program for other areas in our plant ie: maintenance schedules etc.

Frank Wall
